krishi udaan

Krishi Udaan is an AI-powered Smart Agriculture System that leverages cutting-edge drone technology and intelligent data analytics to revolutionize crop monitoring and management. Designed with the goal of empowering farmers, Krishi Udaan provides real-time insights, actionable recommendations, and seamless integration with existing farm management platforms.

Expense Distribution (Year 1)

Key Partners

- Government agencies (for subsidies & policy support)
- Farmer cooperatives & FPOs (user base expansion)
- Agribusinesses (data buyers, strategic investors)
- Agri-universities and research bodies (validation & outreach)
- Logistics and drone manufacturing partners

Key Activities

- AI & drone-based crop monitoring
- Data collection & analytics (crop health, soil, water usage)
- Field demonstrations & farmer training
- Tech maintenance and platform updates
- Customer support & feedback loops

Key Resources

- AI models (CNN), drones, and IoT sensors
- Cloud infrastructure (analytics platform)
- Skilled R&D and agri-tech team
- Mobile application & backend system
- Farmer training modules & content

Value Proportions

- Automated Crop Growth Reports
- Soil Health Diagnostics
- Smart Irrigation Scheduling
- Yield Comparison Dashboards
- Voice-Enabled Support in Regional Languages
- Supply Chain Integration Tools
- Government Scheme Alerts & Subsidy Tracking
- Farming Calendar & Task Reminders
- Offline Functionality with Auto-Sync

Customer Relationship

- Personalized Onboarding & Training
- Dedicated Agronomy Support
- Automated In-App Chatbot
- Self-Service Platform
- Community & Co-Creation
- Proactive Outreach

Channels

- Field Demonstrations via Cooperatives
- Mobile App Distribution (App Stores)
- Government Tender & Subsidy Programs

Customer Segments

- Small & Marginal Farmers in remote/rural areas
- Medium & Large Commercial Farms seeking yield optimization
- Agricultural Cooperatives & FPOs (Farmer Producer Organizations)
- Government Agriculture Departments (for subsidy-backed rollouts)
- Input Suppliers & Agribusinesses (seed, fertilizer, pesticide companies)
- Agri-research Institutions and universities

Cost Structure

Item	Year 1	Year 2	Year 3
Drone & Hardware Ops	40,00,000	35,00,000	30,00,000
App & AI Dev	27,00,000	10,00,000	5,00,000
Salaries	25,00,000	35,00,000	45,00,000
Promotions	8,00,000	12,00,000	20,00,000
Hosting & Maintenance	5,00,000	7,00,000	10,00,000
Office & Utilities	5,00,000	6,00,000	7,00,000
Miscellaneous	5,00,000	5,00,000	5,00,000
Total Expenses	1,15,00,000	1,10,00,000	1,22,00,000

Revenue Streams

Item	Year 1	Year 2	Year 3
Drone-as-a-Service (DaaS)	12,00,000	24,00,000	42,00,000
Subscription Plans	30,00,000	60,00,000	1,20,00,000
B2B Sales	30,00,000	60,00,000	1,20,00,000
Precision Spray Commissioning	20,00,000	56,00,000	68,00,000
Total Revenue	92,00,000	2,00,00,000	4,50,00,000
